

## Absolutely Safe & Healthy

The *BreathEZ* Air Purifier is not a mask, not a cover up. It uses no chemicals. It's a safe, affordable and effective air purification method that uses a 60-year old idea, originally used for industrial air purification, and it works 24 hours a day to keep the air in your home pure and fresh.

## About Ozone

The Occupational Safety and Health Administration (OSHA) designates as safe an 8-hour ozone exposure limit of 0.1 ppm (parts per million). The Food and Drug Administration (FDA) sets its exposure limit for ozone at 0.05 ppm. Nature's concentrations at ground level are typically between 0.75 ppm and 0.03 ppm. The *BreathEZ* Air Purifier outputs between 0.015 ppm and 0.005 ppm depending on the volume of air, thus generating extremely safe purified air for you and your family.

*You want the best for your family—their health, their home, and all the things that affect their well being. Why take chances with the air they breathe?*

Safeguard your family now—purify the air in your home 24 hours a day with the

Details Inside.

*Your family's needs come before everything...you're deeply concerned with their health, their safety and the quality of their lives. You worry about them when they're not feeling well, and you want to protect them from the harmful things with which they may come in contact every day.*

*Their home is their haven—a place where they feel safe and protected. But would it surprise you to learn that in your home the ductwork, carpets, dust—even the air—harbor microorganisms that can endanger the health and well being of you and your family?*

We invite you to try the *BreathEZ* Air Purifier—an electronic air purification system that eliminates airborne microorganisms, leaving only clean, fresh, purified air throughout your home. Within hours of installation, you'll discover an improvement in the quality of the air you breathe. You'll notice an unmistakably clean, fresh scent that tells you the air in your home is as pure as the air outdoors after a thunderstorm.

## BreatheEZ™ Air Purifier

- **100% completely safe** for humans, pets and houseplants
- **Environmentally friendly**, uses no chemicals
- **Improves air quality** by destroying airborne pollutants such as mold, mildew, bacteria, algae, fungus, viruses, smoke and more
- **Economical**—costs less to use than a 50-watt light bulb
- **Leaves a fresh, clean scent** throughout your home
- **Virtually maintenance-free**—Twice a year, simply wipe the bulb with alcohol on a cloth when unit is not running
- **Fast, out-of-sight installation** in the air handler of your central air conditioning system-takes 30 minutes or less
- **Silent operation**
- **Labor and parts guaranteed for 3 years** from date of installation

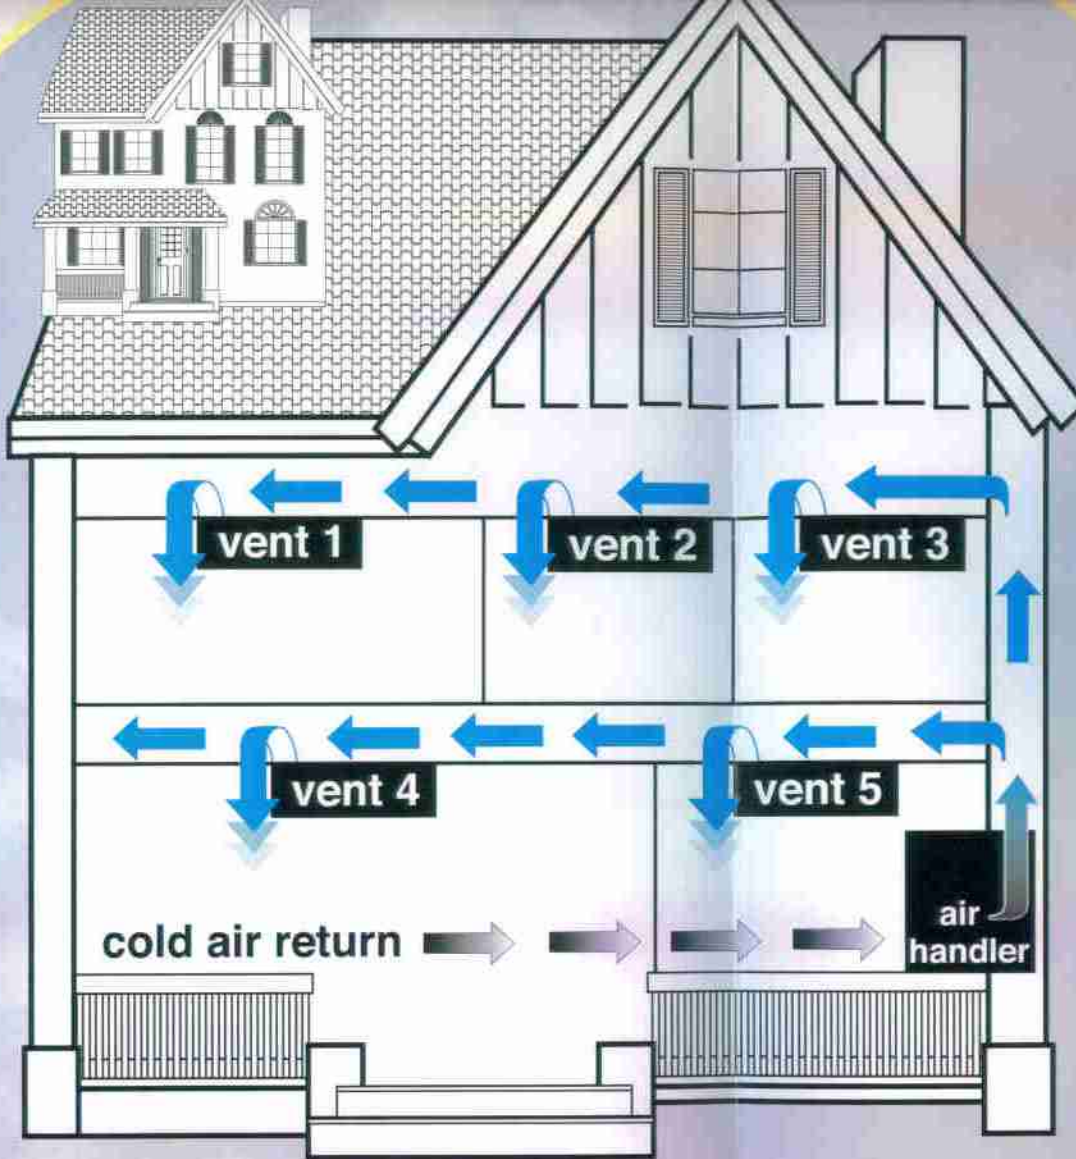

### How It Works

The *BreatheEZ* Air Purifier uses a high frequency ultraviolet lamp, easily installed within minutes in your central heating and air conditioning system. The

ultraviolet light radiates directly on the air conditioning coil and the air being pulled across it by the cold air return. The light produces a tiny amount of ozone—that same natural gas found in nature's healthiest outdoor locations. The ozone destroys airborne microorganisms, eliminating them and leaving fresh, clean purified air throughout your home.

### 60-Day No Risk Guarantee

Try the *BreatheEZ* Air Purifier in your home. If, within 60 days from the date of installation, you are not completely satisfied, just call your installer to remove the unit and refund your purchase price in full — no questions asked. *It's that simple!*

*Removing pollen, dust mites, mold, mildew and pet dander from the air reduces the discomfort of colds and allergic sensitivity, allowing your immune system to perform at its best.*

*Asthma can be triggered by contact with allergens often found in the home. Clean air is the answer!*

### Great for Allergy & Sinus Sufferers

While we make no health claims regarding the *BreatheEZ* Air Purifier, our customers frequently report an increased feeling of wellness, less stressful breathing, and a noticeably more pleasant living environment following installation of this remarkable device. They also appreciate the absence of household odors caused by smokers and pets.

*Some people spend as much as 90% of their time indoors. Poor indoor air quality can give rise to headaches and chronic fatigue. Our bodies need clean, fresh air to stay healthy.*
